OPT

OPT

OPT is Innoventz's customized, proprietary productivity tool for Oracle Clinical. Its robust capabilities and intuitive interface will revolutionize how you manage trial data.

OPT IS COMPOSED OF SIX MODULES:

1. On-line data entry

- Provides a user-friendly interface for performing data entry in OC

2. Off-line data entry

- Allows OC-compatible data collection when an internet connection is not available

3. Batch Data Loading

- Enables users to load text files into an OC study database

4. OC Data Transfer

- Facilitates study data transportation across OC servers

5. Validation Procedures Verification

- Permits OC programmers to verify VP logic

6. Reports

- Supplies comprehensive details on discrepancies.

Contact us today and learn more about how OPT can take your clinical trial to the next phase.

Services

SOME UNIVERSAL ELEMENTS OF OUR SERVICES INCLUDE:

- Up-to-date information on the latest regulatory issues
- Utilization of the most current and powerful technology
