

SAVE 10%
on any purchase at razorama.com!

spring safety tips:

- When riding your Razor scooter, it is crucial to always wear a helmet approved by ANSI, SNEL or ATSM, as well as elbow and knee pads.
- In addition to specific safety gear, always wear athletic shoes (lace-up shoes with rubber soles) when you're riding—never use your Razor scooter when you're barefoot or wearing non-athletic shoes. Ouch!

spring maintenance tips:

- Turn the power switch off of your electric Razor vehicle and recharge your battery for at least 8 hours after each extended use. When the vehicle is not in regular use, recharge the battery at least once a month until normal use is resumed.
- When installing cool new grips, apply a small amount of dish soap to the handle bars beforehand for lubrication. This will help prevent any accidental damage and tearing!
